District Assessment &  
Transition Readiness Coordinator

**August 30<sup>th</sup>, 2021**

**Dear Parents/Guardians and School District Employees:**

Each of the four Livingston County Schools will be inspected for pests on a routine basis throughout the 2021-2022 school year. Treatments will follow on an as needed basis and in compliance with state regulations. The inspections/treatment of the cafeteria will be on or near the first Monday work of each month by McGee's Pest Control of Murray.

For pesticide applications made when children are present, the school authority shall provide the notification to persons listed on the registry at least one (1) hour prior to the making of the application. Pesticides may be applied without notification indoors and to outside areas when children are not present.

For more information, please contact McGee Pest Control at 270-753-0414 or Amy Ramage at 270-928-2111.

Sincerely,  
*Amy Ramage*
