

Answer 1:

Migration will begin Thursday, April 22, 2018 in the afternoon beginning around 3:30 PM and *most likely* be done Friday sometime. However, there will be more post-migration tasks that will have to be performed on Friday. The expectation is that email will be fully functional once again by Tuesday, May, 1st 2018. Some will be able to receive and send email before others on Tuesday. That is to be expected. Everyone should be patient and understand everything will not be working perfectly until sometime the following week.
